SURVIVAL INSTINCT

HOW MUCH WATER

Minimum water storage needs per person (1–2 week supply)

1 2 3 4 5 6 7 8 9 10	1 Person = 14 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	2 People = 28 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	3 People = 42 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	4 People = 56 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	5 People = 70 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	6 People = 86 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	7 People = 100 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	8 People = 114 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	9 People = 128 Gallons	14 28 42 56 70 86 100 114 128 142	
1 2 3 4 5 6 7 8 9 10	10 People = 142 Gallons	14 28 42 56 70 86 100 114 128 142	

This would give you enough water to drink and take care of basic sanitation needs for one – two weeks.

This is what that looks like for families of various sizes. Use the tick box when you have reached the right amount.

This can be a lot of water, depending on your storage space. If you don't have the space, store as much as you can.
